

category	B.A.S.S. traps
description	ProCorner
part code	GRG180/GRG190

GRG180-190 PROCORNER B.A.S.S. TRAPS have a revolutionary and innovative profiled design to optimise the corner mounting position of acoustic foam.

It has a profile that matches the ProFoam panels shown at <http://www.customaudiodesigns.co.uk/absorbers/profoam.htm>.

Acoustical foam provides the most cost-effective approach to controlling interfering reflections and unwanted reverberant noise. By combining ProFoam and ProCorner, a complete acoustical foam room treatment system is possible.

Studio in a box

Contents:

10 @ 1200 x 600mm sheets

32 @ 300 x 300mm squares

4 @ Pro Corners

[Details](#)

Features

- New optimised and attractive corner profile
- NRC (Noise Reduction Coefficient) of 1.0
- Surface profile matches ProFoam wall panels
- ProCorner installs easily
- Available in white Class 0 fireproof melamine and gray UL94 polyurethane (flammable)
- The ProCorner offers a designed corner treatment that adds an interesting acoustic sculpture to the room's corners, while helping to control excessive sound pressure build up.

Problem

In rooms where acoustic foam is used as the primary surface treatment, a system that includes co-ordinated, attractive wall and corner panels is needed, utilising the depth of the corner and absorbing more mid and bass frequencies than surface mounted acoustic foam with less depth.

Solution

The ProCorner complements the ProFoam nestable wall panels to create a complete acoustic foam room treatment. The ProCorner integrates seamlessly with the ProFoam wall panels and offers an NRC of 1 down to around 100Hz! for exceptional broad-bandwidth absorption.

Specifications

1200mm (H) x 355mm (W) x 160mm (D) (approx. – check exact size when ordering)

Installation

Simply apply construction adhesive to the sides where they will contact the mounting surface.

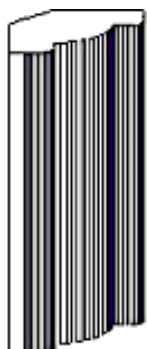

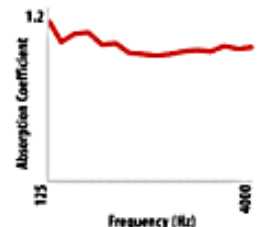

When installed in a corner the units stick out 240mm along each side wall.

NB: this product is no longer available in purple colour.

Acoustic Performance

Absorption

The ProCorner offers ideal absorption across the audio spectrum in a convenient corner mounted panel. The graph indicates the random incidence absorption coefficient measured at Riverbank Labs.
