

category	sound absorber/diffuser
description	pyramid®
part code	PYR060

Foam colours:

PYR060 PYRAMID® is an acoustic panel that combines simultaneous diffusion and absorption features for the audio and music industry.

The ATP® PYRAMID® is extremely finely balanced because of the combination of hemispherical acoustic diffusion and absorption

This design was based on a quadratic shape with flat absorption surfaces made of acoustic foam, with curved diffusion surfaces made of high density EPS which, unlike most other products on the market, is 80kg/m³ rather than the inferior, less effective, 30kg/m³.

Features

- NRC average: 0.75/m² [>100Hz; <10kHz]
- Average diffusion: 0.45/m² [>100Hz; <10kHz]
- Installation: glues included
- EPS Euroclass fire-retardant (NP EN 13501-1)
- Very easy to install
- Lightweight
- For wall and ceilings
- White with three foam insert options.
- Can be used in T-Grid ceilings
- α_w=0.60 (MHH)
- Absorption Class C
- **Made from 100% recyclable EPS**
